

MD ADIL RAZA

Software Engineer | Full Stack Developer

✉ mdadilraza510@gmail.com 📞 +91 6203662085 🔗 LinkedIn 🐙 Github 🍳 CodeChef 🔗 Portfolio 📍 Bangalore, India

PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience in full-stack development, building REST APIs, real-time systems, and AI-powered applications using Java, React.js, Node.js, Python, and FastAPI. Seeking Software Engineer, Full Stack Developer, or Backend Engineer opportunities.

EDUCATION

Bachelor of Engineering, New Horizon College of Engineering 🔗 2023 – 2027 | Bangalore, India
Computer Science Engineering

TECHNICAL SKILLS

- **Languages:** Java, Python, C, SQL
- **Frontend:** React.js, TypeScript, Vite, HTML5, CSS3, Tailwind CSS, Figma
- **Backend:** Node.js, FastAPI, REST APIs, WebSockets
- **Databases:** MySQL, SQLite, MongoDB
- **AI & Computer Vision:** YOLOv8, OpenCV, Prompt Engineering, LLM API Integration
- **Cloud & Tools:** AWS, Google Cloud, Docker, Git, GitHub, Vercel, Render
- **Core CS:** OOP, DSA, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Future Interns 🔗, Full Stack Web Developer Intern 02/2026 – 03/2026 | Remote

- Developed responsive web applications by building React.js, HTML5, and CSS3 interfaces integrated with a Python-based backend.
- Designed and integrated REST APIs to enable reliable frontend-backend communication across application modules.
- Implemented MySQL database schemas and used Git/GitHub for version control within an Agile team workflow.

PROJECTS

Smart Infra: AI Infrastructure & Monitoring System 🔗 Mar/2026 – Present

Tech Stack: React.js, TypeScript, FastAPI, Python, YOLOv8, OpenVINO, SQLAlchemy, WebSockets

- Architected a full-stack infrastructure monitoring platform by pairing a FastAPI backend with a React and TypeScript dashboard for real time traffic analytics.
- Trained a custom YOLOv8 model achieving **66.5% mAP@50** and optimized inference using Intel OpenVINO for deployment.
- Enabled real-time anomaly detection and live video streaming by implementing WebSocket connections with SQLAlchemy backed data processing.

CyberShield X 🔗, AI-Powered Threat Intelligence Platform Mar/2025 – Jul/2025

Tech Stack: React.js, FastAPI, MySQL, Machine Learning

- Developed an AI-powered phishing detection platform combining machine learning, NLP, and rule-based analysis, achieving **96%+ detection accuracy**.
- Reduced scan response time by 40% by optimizing backend API logic and MySQL database queries.

AS Global Institute of Safety & Management 🔗, Website July/2026 – Aug/2026

Tech Stack: React 19, TypeScript, Vite, Tailwind CSS v4, Framer Motion, Node.js

- Built a production ready EdTech institutional website by architecting a React 19, Node.js monorepo with full TypeScript coverage.
- Implemented a centralized motion design system by adding accessibility-compliant, reduced-motion animations and scroll-linked parallax using Framer Motion.
- Improved page performance by integrating skeleton screens and lazy Loading, and managed client requirements through full deployment as sole developer.
