PROFILE

Computer Science Engineering student specializing in full-stack development and software engineering. Experienced in building scalable web applications using Java, Python, React, Node.js, SQL, and Git. Developed AI chatbot, analytics dashboard, and client management systems through real-world projects. Strong interest in backend systems, problem solving, and modern application development.

SKILLS

Technologies/Frameworks: HTML5, CSS3, React, Node.js, Tailwind CSS, RESTful APIs

Programming Languages: Java, Python, C, JavaScript, C++

Developer Tools: Git, GitHub, OS

Databases : MYSQL, MongoDB

Cloud : AWS, Google Cloud

EXPERIENCE

Future Interns, Full Stack Web Developer Intern 02/2026 – 03/2026 | Remote

- Developed responsive web applications using React.js, HTML5, CSS3, improving user interface performance and usability.
- Designed and integrated REST APIs for seamless communication between frontend and backend systems.
- Implemented and managed MySQL database schema for efficient data storage, retrieval, and transaction handling.
- Used Git and GitHub for version control, code collaboration, and project tracking in a remote team environment.
- Identified and fixed UI bugs while optimizing website responsiveness across desktop and mobile devices.
- Collaborated with team members to deliver features within deadlines using agile development practices.

PROJECTS

GYANIBABA AI Chatbot July/2025 – Jan/2026

- Developed AI chatbot using Grok LLM API to answer user queries in natural language.
- Integrated frontend chat UI with backend API for real-time conversations.
- Improved prompt engineering for better response relevance and flow.
- Optimized API handling and responsive UI for mobile and desktop.

Client Lead Management CRM Nov/2025 – Jan/2026

- Built lead management system to track and organize client inquiries.
- Implemented CRUD operations for managing lead records and updates.
- Designed dashboard for statuses: New, In Progress, Converted, Closed.
- Added search, filters, and role-based access for workflow efficiency.

SalesPulse Analytics Dashboard May/2025 – Mar/2026

- Developed analytics dashboard to monitor KPIs and business performance.
- Visualized sales trends, revenue growth, and customer metrics.
- Added filters and search for dynamic reporting.

Personal Expense Management System Sep/2024 – Mar/2025

- Built expense tracker using Java and MySQL for managing transactions.
- Implemented CRUD operations for records and categories.
- Generated monthly summaries and reports for spending analysis.

EDUCATION

Bachelor of Engineering, New Horizon College of Engineering 2023 – 2027 | Bangalore, India
Computer Science Engineering

CERTIFICATES

- | | | | |
|------------------------------------|-----------------------------------|-------------------------------|--------------------|
| • AWS CLOUD PRACTITIONER ESSENTIAL | • Google Cloud Arcade Facilitator | • Python 101 for Data Science | • Data Science 101 |
| • Database Management System | • Cloud Computing | • Full Stack web Development | |

TECHNICAL ACHIEVEMENTS

Quantum_X25, Hackathon 04/2025

Pixel Pursuit, Mobile Development Club 11/2024

Silver Spectrum Techfest Hackathon, Technical Volunteer 10/2025
