

MD ADIL RAZA

Bangalore, India | mdadilraza510@gmail.com | +91 6203662085 | LinkedIn | Github | CodeChef | Portfolio

PROFILE

Computer Science Engineering student with full-stack development experience across client and personal projects, building REST APIs, real time systems, and AI-powered applications using React, Node.js, Python, and FastAPI. Seeking Software Engineer, Full Stack Developer, or Backend Engineer roles.

EDUCATION

Bachelor of Engineering, New Horizon College of Engineering
Computer Science Engineering

2023 – 2027 | Bangalore, India

TECHNICAL SKILLS

- **Languages:** Java, Python, C, SQL
- **Frontend:** React.js, TypeScript, Vite, HTML5, CSS3, Tailwind CSS, Responsive Design
- **Backend:** Node.js, FastAPI, REST APIs, WebSockets
- **Databases:** MySQL, SQLite, MongoDB
- **AI & Computer Vision:** YOLOv8, OpenCV, Prompt Engineering, LLM API Integration
- **Cloud & Tools:** AWS, Google Cloud, Git, GitHub, Vercel
- **Core CS:** OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE

AS Global Institute of Safety & Management, Freelance/Client Project

Jul/2026

Tech Stack: React 19, TypeScript, Vite, Tailwind CSS v4, Framer Motion, Node.js

- Built a production-ready EdTech institutional website by architecting a React 19 and Node.js monorepo with full TypeScript coverage for a real client.
- Implemented a centralized motion design system by adding accessibility-compliant, reduced-motion animations and scroll-linked parallax using Framer Motion.
- Improved page performance by integrating skeleton screens and lazy loading, and managed client requirements through full deployment as sole developer.

Future Interns, Full Stack Web Developer Intern

02/2026 – 03/2026 | Remote

- Developed responsive web applications by building React.js, HTML5, and CSS3 interfaces integrated with a Python-based backend.
- Designed and integrated REST APIs to enable reliable frontend-backend communication across application modules.
- Implemented MySQL database schemas and used Git/GitHub for version control within an Agile team workflow.

PROJECTS

Smart Infra: AI Infrastructure & Monitoring System, RTMS

April/2026 – Present

Tech Stack: React.js, TypeScript, FastAPI, Python, YOLOv8, OpenVINO, SQLAlchemy, WebSockets.

- Architected a full-stack infrastructure monitoring platform by pairing a FastAPI backend with a React and TypeScript dashboard for real time traffic analytics.
- Trained a custom YOLOv8 detection model achieving **66.5% mAP@50**, optimizing inference with Intel OpenVINO for deployment.
- Enabled real-time anomaly detection and live video streaming by implementing WebSocket connections with SQLAlchemy backed data processing.

CyberShield X, AI-Powered Threat Intelligence Platform

Mar/2025 – Jul/2025

Tech Stack: React.js, FastAPI, MySQL, Machine Learning.

- Developed an AI-powered phishing detection platform combining machine learning, NLP, and rule-based analysis, achieving **96%+ detection accuracy**.
- Reduced scan response time by 40% by optimizing backend API logic and MySQL database queries.

GYANIBABA AI Chatbot, AI-Powered Knowledge Assistant

Aug/2025 – Jan/2026

Tech Stack: React.js, Node.js, Grok LLM API

- Built an AI chatbot by integrating the Grok LLM API with a React frontend and Node.js backend for real-time natural language conversations.
- Improved response relevance and conversational flow by refining prompt engineering techniques for the chatbot's LLM queries.

TECHNICAL ACHIEVEMENTS

- Solved 170+ Java-based DSA problems on CodeChef and 100+ SQL queries, strengthening algorithmic and database proficiency.
- Participated in coding contests (Pixel Pursuit) and hackathons (Quantum_X24), applying full-stack skills under time pressure
